

## Decay Theory

🕒 Monday, 1 July, 10:24 AM » 12:24 PM

📅 User event

☰ I studied decay theory, which suggests that memories fade over time if not recalled. This idea resonates with my experience of childhood memories becoming blurry. Critics argue that forgetting involves more than just time, pointing to factors like interference. Despite this, decay theory highlights the fragility of our memories, reminding me to actively revisit my past to keep it vivid.

## Meeting with PR team for HPV vaccines

🕒 Tuesday, 2 July, 1:40 PM » 3:40 PM

📅 User event

☰ We had a very short interaction with a team that had come to offer a plan/scheme for providing HPV vaccines at a subsidised rate at the station. The interaction provided us with valuable insights on the importance and awareness on HPV and helped us gain momentum in starting our own awareness on spreadability, causes, prevention measures and vaccination measures and preventive measures. Following this I also presented a working model for risk prediction to sir to decide the next course of action.

## Presentation on Personality and its development ×

 Friday, 12 July, 12:20 AM

 User event

 We had a presentation on personality development with a few references from well established papers on psychology which gave us important insights into the field.

## Presentation on Patents and Trademarks ×
